The amendment to claim 1 of the 10/3/06 response obviates the 112 first issue. An action on the merits follows.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 7 are rejected under 35 U.S.C. 102b as being anticipated by Thomas et al.

The showerhead is seen at 40, the hand grip at 46 connected as set forth in instant claim 1. The size ratio of the two appears to meet the claim 1 parameters. The "fitting" is seen at 186 and as shown in Fig. 6B accepts the "union nut" 156, which as seen in Fig. 1 "forms an extension of the handgrip" and is deemed to provide respons to the amended portion i.e. the last four lines of claim 1.. Re: claim 2, if the grip 4 of the instant device as depicted in Fig. 1 is "approximately parellel", as set forth in claim 2, then the same relationship is present in Thomas et al as depicted in Fig. 1. Element 80 passes the shower water and in col. 9, lines 2-3, is called a hose. Observation of the line depicted as element 56 between the upper end of union nut 156, to the point where this line meets showerhead 40 with the diameter of 40 seen as the line above the spray outlets, clearly falls within the ration of 1:2.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Application/Control Number: 10/735,440

Art Unit: 3751

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Thomas et al as applied supra.

With respect to claim 5: the depth of the head 40 near the center compared to the diameter of the surface from which the jets exit is approximately 1:4. This falls within the range set forth in paragraph 3 of page 3 and as such possess obvious equivalence to the ratio claimed here.

pertains.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Thomas et al in view of DE 19942853.

To provide the former with an oval shape as taught by the latter at 1 would have constituted an obvious expedient of choice in design.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the substance of claim 1, lines 12-13 i. e. "the union nut having an outer surface that is flush with the outer surface of the handgrip" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered. The showing in Fig. 1 does not convey this parameter and the disclosure is silent as to which surfaces of the respective elements are flush. That is the end surfaces would meet this parameter as they are "outer".

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended

Art Unit: 3751

replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles E. Phillips whose telephone number is 571-272-4893. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Greg Huson, can be reached on 571-272-4887. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

Application/Control Number: 10/735,440

Art Unit: 3751

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).

Applicant's amendment necessitated the new ground(s) of rejection presented in

this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37

CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE

MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later

than SIX MONTHS from the date of this final action.
